WHAT IS PLATELET RICH PLASMA (PRP)?

PRP is blood plasma that has been collected from the patient's body and enriched with concentrated platelets infused with a cocktail of bioactive proteins and human growth hormones.

PRP Therapy has been widely used since the 1990's to aid in patient recovery after surgery. This emerging biotechnology continues to expand its reach in other areas of medicine, notably in orthopedics, rehabilitative and restorative medicine PRP is performed under ultrasound guidance by a radiologist.
